

Please reject petition 04-160. I listen to XM radio for the variety xm offers without the commercials. If local broadcast worries about losing customers they should improve their "product". I personally resent the fact that NAB feels the need to use an incompetent bureaucracy like the FCC. All this country needs is the FCC forcing imposing its will on the american public yet again. The choice is ours not yours to make. IF i dont like whats on television or the radio (satellite or terrestrial) I turn the channel. I suggest you do the same.
